

Building into the future

bautec

International Trade Fair for
Building and Construction
Technology

21-25 February 2012

The bautec system network: A real benefit for your business!

As the year's most important building industry trade event, bautec 2012 showcases the professional expertise and ingenuity across the entire sector. Along with the rapidly growing focus on energy costs and energy savings factors, the leading building materials and construction systems manufacturers have been faced with sweeping changes in energy policies. This has driven them to develop cutting-edge market solutions. It also confirms the successful bautec approach of offering an unparalleled platform based on a system network combining building envelope with building services. Once again this year, the major suppliers of energy, heating and air conditioning systems will be working together to present a comprehensive spectrum of products and services.

Sharing the same dates and venue in 2012 are the special shows build IT, metall IT, SolarEnergy, BioGas World, the FIW Real Estate and Housing Industry Forum and GRÜNBAU BERLIN.

If you're interested in meeting the right people for your project, building new business partnerships, and seeing the best products, come to bautec 2012 and gain insight into the future of building. Welcome to bautec!

All under one roof at bautec 2012:

The spectrum of products and services at the special presentations and shows taking place in conjunction with bautec 2012 make your presence at the event all the more worthwhile.

Presents equipment, products and solutions for designing and maintaining outdoor spaces.

The eleventh edition of the international trade show for energy from solar, wind, renewable raw materials, soil and water resources.

First international, association independent trade show for biogas technology and systems in Europe.

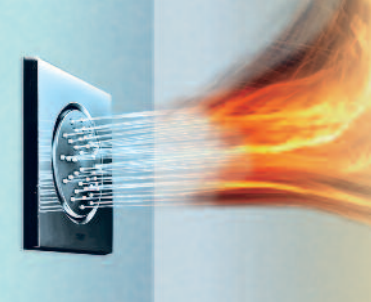

Special show for information and communications technology in the construction sector and computer-based solutions designed to help secure a competitive edge.

Special show for software in the metal industry provides an overview of recent software developments and trends in the metals sector. **On 23 Feb. at the Marshall-Haus.**

The Real Estate and Housing Industry Forum is a new segment in line with the key theme "building into the future."

Energy-efficient Building

Successful spectrum at bautec

- Outdoor systems
- Construction chemicals and protective agents
- Construction machinery, Construction site equipment, Elevated access systems
- Building materials
- Fire protection
- Roofs
- Electrical engineering and equipment
- Facade construction
- Windows, doors, gates
- Prefab buildings / construction systems
- Building services / automation
- Glass
- Heating systems, chimneys
- Timber-frame construction
- Interior construction and drywall
- Climate control and ventilation
- Building frame construction
- Plumbing
- Software
- Civil engineering
- Associations and consultants
- Tools, machinery, systems

- Site map**
- Roof, wall, façade, drywall, chemical protection, building and insulating materials
 - Sanitary systems, heating, air conditioning, energy, flagstones
 - Outdoor systems, construction machinery, concrete building, scaffolds, machinery, formwork systems, safety engineering, tools, natural stone
 - Timber, lumber, windows, doors, gates, stairs, flooring, glass, renewable resources
 - Conferences, congress
 - build IT
 - GRÜNBAU BERLIN
 - FIW – Real Estate and Housing Industry
 - SolarEnergy
 - BioGas World
 - Outdoor areas
 - Press Center
 - Entrances: North, Hall 25, Hall 7
 - Shuttle Bus Airport Tegel / - car park Olympiastadion

The **VIRTUAL MARKET PLACE®** is your online platform for information and communication with construction industry companies. This is where you can set up online appointments with exhibitors and plan your trade fair itinerary on your PC: www.bautec.com

The bautec supporting program focuses on today's trends
